SUMMARY

Supply Chain graduate student with experience in demand planning, inventory management, replenishment planning, and supply chain operations across fast-paced environments. Skilled in forecasting support, inventory records management, Excel reporting, KPI tracking, vendor coordination, and product availability analysis. Proficient in Advanced Excel, Pivot Tables, VLOOKUP/XLOOKUP, Power BI, SAP ERP, and SQL for report generation, trend analysis, and data-driven supply chain decisions.

TECHNICAL SKILLS

Demand Planning: Demand Forecasting, Forecasting Support, Historical Data Analysis, Trend Analysis, Supply Planning, Product Availability
Inventory Management: Inventory Management, Inventory Reconciliation, Replenishment Planning, Safety Stock, Reorder Points, Stockout Risk
Excel & Reporting: Advanced Excel, Pivot Tables, VLOOKUP/XLOOKUP, Power Query, Report Generation, KPI Tracking, Data Accuracy
Analytics & Systems: Power BI, SQL, SAP ERP, ERP/MRP Analysis, Dashboarding, Data Visualization, Operational Reporting
Supply Chain Operations: Order Fulfillment, Material Tracking, Product Flow, Lead Time Analysis, Shortage Analysis, Operational Efficiency
Coordination: Vendor Coordination, Supplier Lead Time Tracking, Cross-Functional Collaboration, Issue Resolution, Documentation Control

WORK EXPERIENCE

Sourcing and Procurement Analyst | Ally Financial | Raleigh, USA *Jan 2025 – May 2025*

- Enhanced vendor selection accuracy and cost visibility across **24 lifecycle activities** by building a TCO model in Excel for supply decisions
- Accelerated vendor evaluation cycle time by **27%** by enabling make-versus-buy decisions and coordinating procurement workflows
- Strengthened vendor visibility by **18%** across **17 vendors** using scorecards tracking lead time, service risk, and supplier delays
- Automated Excel **report generation** and reduced manual effort by **23%** by building KPI pipelines across **6 departments**
- Supported **PO tracking, vendor coordination, and product availability** by managing procurement workflows and escalating order delays
- Improved delivery **risk visibility by tracking open orders, supplier delays, and service issues** across vendor workflows for timely escalation

Supply Chain Operations Intern | Tecnicas Reunidas Engineers India Private Limited | Mumbai, India *Jan 2024 – May 2024*

- Boosted sourcing efficiency by **16%** by streamlining RFQ execution across **5 functions** and aligning specifications with procurement needs
- Reduced documentation retrieval time by **14%** by organizing purchase orders, RFQs, specifications, and inventory records
- Elevated vendor selection across **12+ vendors** and improved quotation accuracy by **11%** using vendor data for supply decisions
- Mitigated stockout risk across **112 SKUs** by building an inventory dashboard with reorder points, lead times, and inbound material status
- Improved **replenishment visibility by 21%** by tracking **reorder points, lead times, and inbound material** status across procurement workflows
- Coordinated **vendor communication, order tracking, and inbound delivery updates** to support timely material flow and product availability

PROJECT EXPERIENCE

Real-Time Inventory Risk Modeling & Replenishment Optimization System

- Engineered a **closed-loop replenishment system** that lowered **stockout risk by 31%** using safety stock and lead time demand modeling
- Built a Power BI dashboard with **DAX to track inventory outlook, replenishment needs, and capital exposure** for planning decisions
- Boosted inventory turnover by **24%** by implementing **ABC prioritization and transaction tracking** to dynamically update risk exposure

Omnichannel Inventory Optimization & Replenishment Strategy

- Identified **inventory inefficiencies across 150 stores**, reducing **excess stock by 22%** using demand-driven replenishment strategies
- Optimized inventory turnover and service levels by 20%** by redesigning replenishment plans using **SKU-level demand variability**
- Minimized **markdown and shrinkage losses by 16%** by aligning inventory planning with **demand forecasting and cost analysis**

Strategic Fleet Capacity Planning & Asset Procurement Optimization

- Modeled a **30-year fleet capacity plan** across 600 railcars, **aligning demand forecasts, asset availability, and transportation capacity needs**
- Optimized fleet procurement decisions by **evaluating purchase, lease, and refurbishment** scenarios using **lifecycle cost and NPV analysis**
- Strengthened demand fulfillment accuracy by **18%** by forecasting multi-commodity demand and aligning fleet capacity through scenario analysis

Smart Facility Analytics Database System

- Developed MS Access reporting system across 4 relational tables and **CRUD forms**, centralizing data entry, lookup, and reporting for **973 records**
- Strengthened **data integrity by 28%** by cleaning **duplicate/null records, standardizing 6 fields**, and validating relational database structure
- Accelerated **reporting efficiency by 19%** by building Power BI dashboards across **5 KPI areas** to surface trends and support faster decisions

Logistics & Crisis Management

- Directed procurement, warehousing, and transportation planning for **4 cargo shipments of 250K books each** across a **\$240K budget**
- Managed **logistics disruption** response during port strikes by evaluating **4 alternate routes** and recommending carrier rerouting through Honduras
- Built a **15-risk register** with contingency triggers for **customs delays, port disruption, warehousing constraints, and shipment execution**

EDUCATION

Master of Engineering Management | North Carolina State University | Raleigh, USA *Aug 2024 – May 2026*
Courses: Operations Research, Project Management, Supply Chain Decision Making, Database Applications *GPA: 3.73/4.00*

Bachelor of Engineering in Mechanical Engineering | University of Mumbai | Mumbai, India *Jun 2019 – May 2023*
Courses: Supply Chain and Logistics Management, Operations Planning and Control *GPA: 3.42/4.00*
